

# Scrum

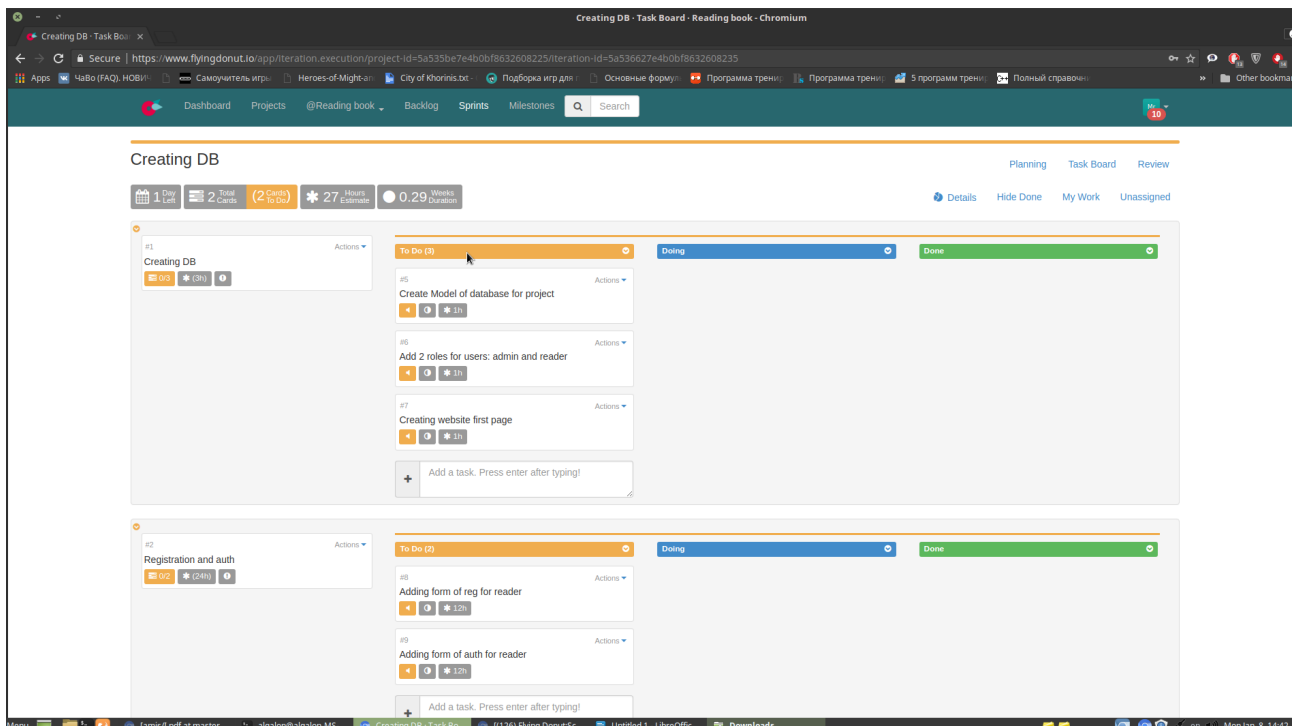

Рис. 1 Creating Database table

Рис.2 Description for login form

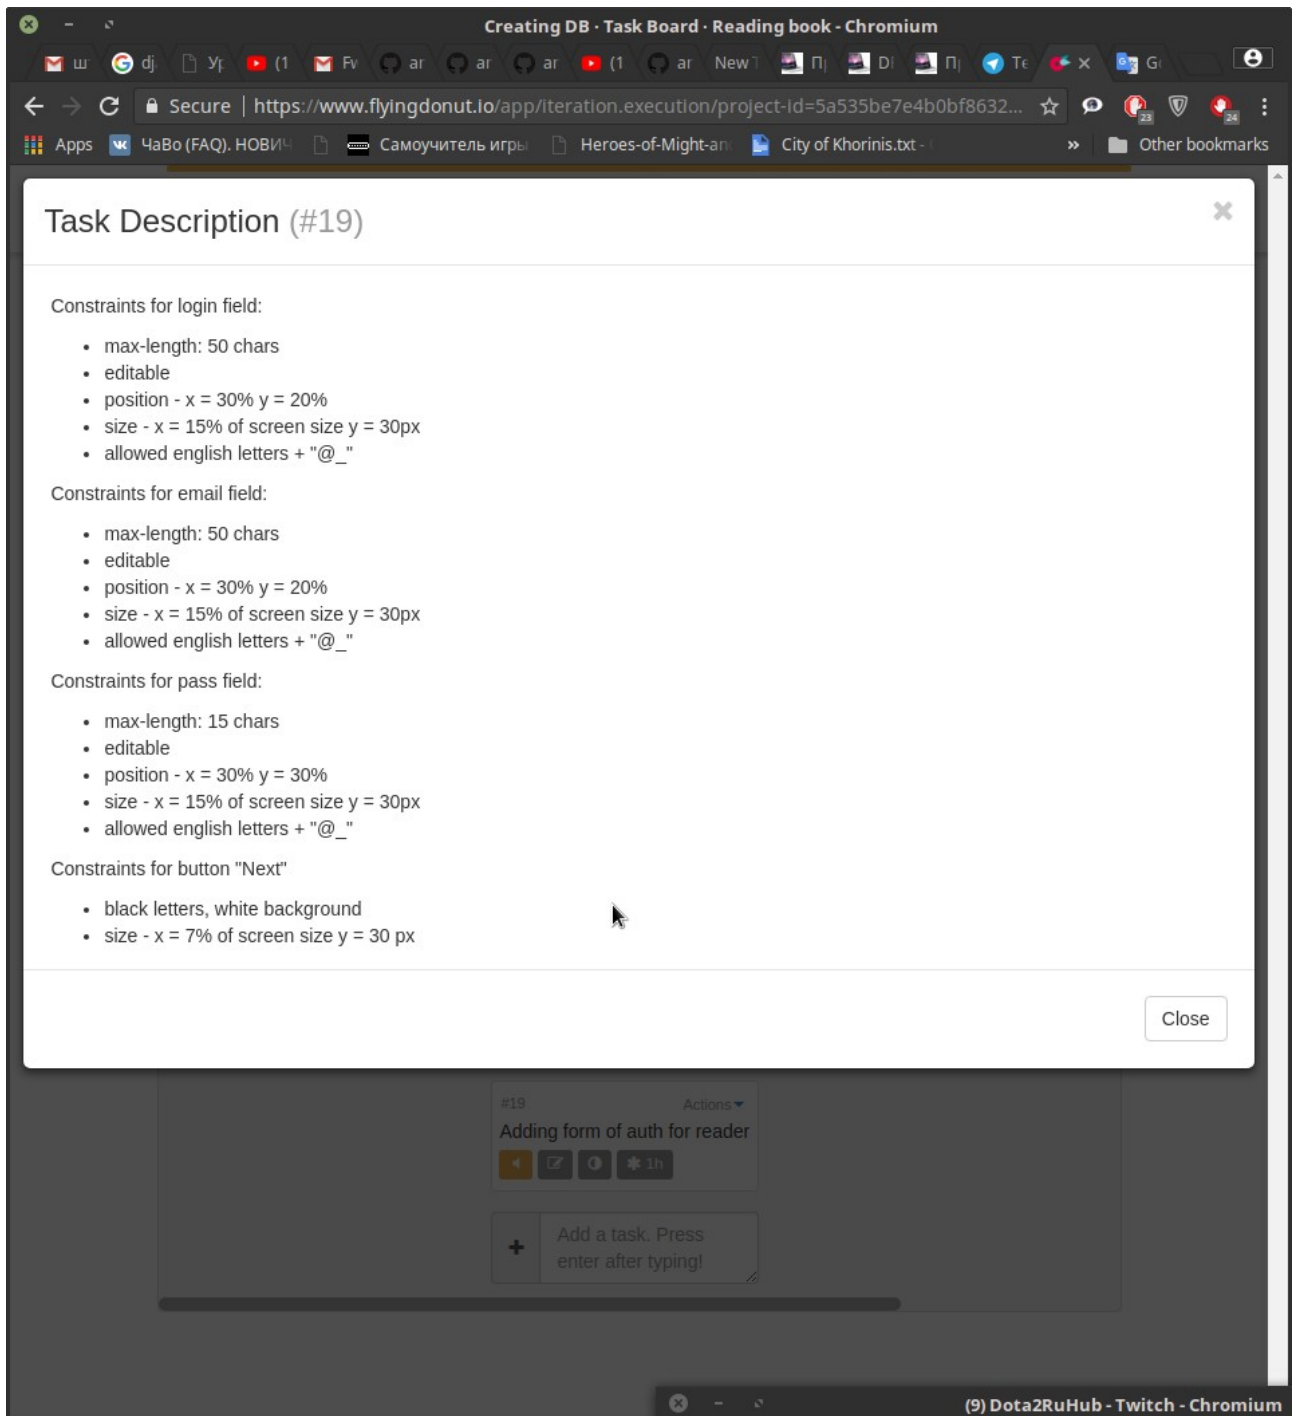

Рис. 3 Description for auth form

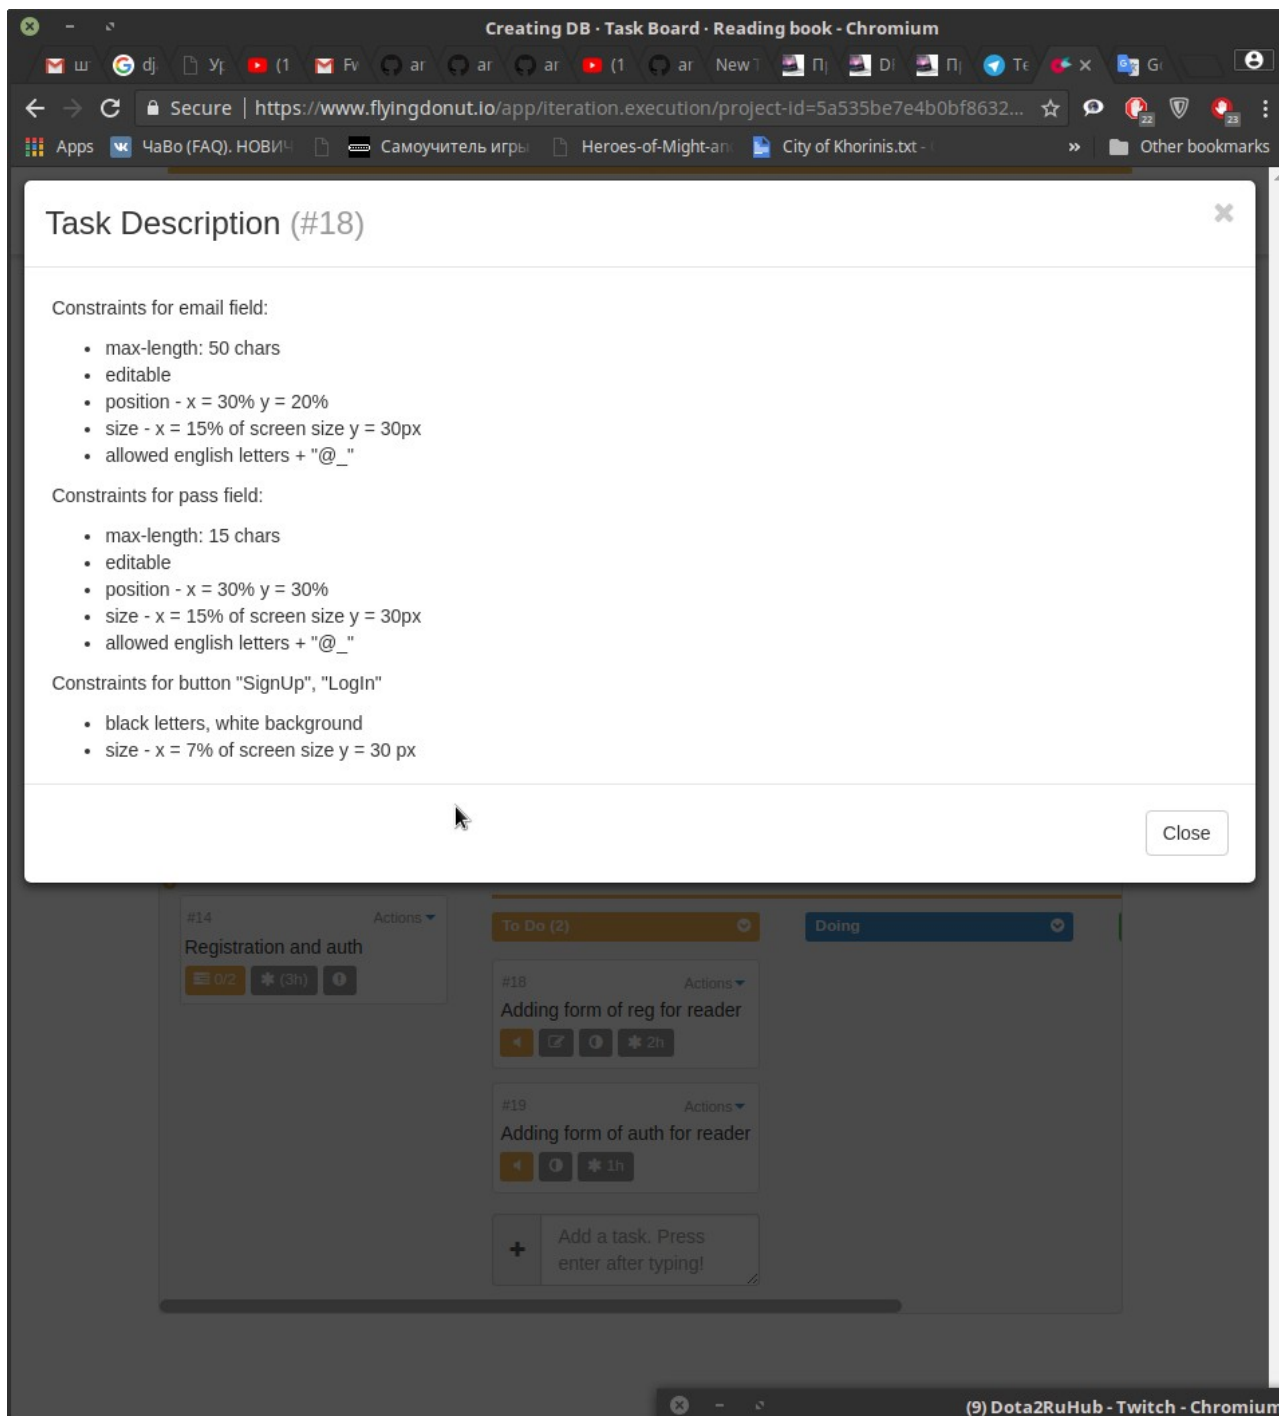

Рис.4 User's functions table

The screenshot displays a web application interface for managing tasks, likely a Kanban board. The interface is divided into two main columns: "Requests" and "Registration and auth".

**Requests Column:**

- #5 Creating a list of books
- #6 Deleting and adding books into the list of books
- #7 Viewing books in list
- #11 Enabling to read a book from a list
- #12 Viewing books from DB

**Registration and auth Column:**

- #8 Viewing all books for every user
- #9 Reading a book

The interface includes a top navigation bar with links for "Hide Done", "My Work", and "Unassigned". A bottom status bar shows the date "Mon Jan 8, 14:50".
